Per our conversation, I will attempt to clarify the legal entity status of the terminal 91 permit. Chemical processors was purchased in the late 1980's and changed its name to Burlington Environmental Incorporated in January of 1992. Burlington Environmental was purchased in December of 1993, but has retained its name and legal entity, as wholly owned subsidiary of Philip Services Corporation. The current legal entity is Burlington Environmental Incorporated, a wholly owned subsidiary of Philip Services Corporation. The agreement will be signed on our side by Marlys Palumbo, Senior Vice President of Law. Ms. Palumbo is currently an officer of the Burlington Environmental entity. If you have any further questions, please contact me at 425 227-6138.
